

About Amdocs

Amdocs is a global software and services company that mainly works with **telecom and media companies**. It helps large companies manage their **customers, billing, payments, and network operations**.

Why Amdocs?

"Amdocs works on large-scale telecom and enterprise systems that impact millions of users. I want to start my career in a company where I can learn industry-level development and grow technically."

~~ Why Amdocs for a fresher?

"Amdocs has structured training, strong mentorship, and exposure to large systems, which is very important for a fresher's career."

What did you find good about Amdocs?

"The learning culture, global exposure, and long-term career growth opportunities."

What values do you bring to Amdocs?

"Consistency, ownership, teamwork, and a strong learning attitude."

1. Tell me about yourself

"I am an MCA student with strong interest in backend development and problem solving. I have worked on real-world projects like an Automatic Attendance System and a MERN-based application. I focus on learning, consistency, and writing clean, reliable code."

2. Where do you belong?

"I belong to Harchandpur, Raebareli, Uttar Pradesh."

3. Tell me about your family and their occupations.

There are 5 members in my family.

My father's name is ABC, is a government employee.

My mother's name is ABC, is a simple house wife.

My elder sister's name is ABC, is now married and a simple house wife.

My younger sister's name is ABC. Currently pursuing BSc.

“My father works as a Safai Karmi (**Sanitation Worker**)” if asked....

4. Walk me through your resume

“I am pursuing MCA from MNNIT Allahabad. During this time, I focused on building practical projects, improving DSA skills, and participating in technical activities. I have worked on ML-based and full-stack projects and regularly practice problem solving.”

5. Is there anything about you not mentioned in your resume?

“Yes, my ability to stay calm under pressure is not mentioned in my resume.”

6. Why did you choose MCA after BSc?

“I did my BSc in PCM, which built my logical and analytical skills. Later, I developed a strong interest in computers and programming, so I chose MCA to gain structured knowledge in computer science and software development. MCA gave me the right foundation to move into the IT industry.”

7. Tell me about your MCA journey so far

“My MCA journey has been very learning-focused. I strengthened / **Enhanced** my fundamentals, built practical projects, and improved problem-solving through contests and coding practice.”

8. How do your projects align with industry requirements?

“My projects focus on real problems like automation, scalability, user management, and performance — which are common requirements in industry systems.”

“My projects focus on real-world problems like automation, scalability, and user management. The attendance system deals with accuracy, privacy, and deployment constraints, while DailyFit focuses on user experience, booking logic, and scalable backend design — all of which are common industry challenges.”

9. Is there any gap year after graduation? Why?

“No.”

10. What is your short-term goal?

“To become a strong software engineer with solid technical foundations. Or with good understanding of systems and clean coding.”

11. What is your long-term goal?

“To become a senior full stack engineer and lead technical soln and guide juniors.”

17. Why should we hire you? Or Why should Amdocs invest in you?

“I am fast learner, have strong fundamentals, project experience, can adopt quickly to new technologies. I take ownership of my work.”

18. How do your skills fit Amdocs’ work culture?

“My problem-solving mindset, willingness to learn, and teamwork skills align well with Amdocs’ enterprise work culture.”

19. Are you comfortable working in shifts?

“Yes, I am comfortable working in shifts.”

20. Are you comfortable with relocation / any location?

“Yes, I am flexible and comfortable with relocation as per company requirements.”

21. Where do you want to work and in which shifts?

“I am open to any location and any shift as per company requirements.”

22. If your manager calls you on Friday evening due to a bug, would you pick the call?

“Yes, I would pick the call because fixing production issues is part of professional responsibility.”

23. If you are working in a team of 4 and 1–2 members are not working, what will you do?

“I will first communicate with them, understand the issue, and help redistribute tasks to meet the deadline.”

24. How do you motivate your team members?

“By appreciating their efforts, helping them when they are stuck, and maintaining open/ clear communication.”

25. What was the hardest time you faced and how did you handle it?

“Balancing academics with project deadlines was challenging. I handled it through planning and consistent effort.”

26. How do you handle pressure or challenging situations?

“I stay calm, break the problem into smaller parts, and focus on solving one step at a time.”

27. How do you handle failure in a contest or project?

“I analyze my mistakes, learn from them, and improve my approach for next time.”

28. Are you able to learn new technologies after joining?

“Yes, I am confident in learning new technologies quickly.”

29. Are you okay working on any technology assigned by the company?

“Yes, I am open to working on any technology assigned.”

30. Do you think AI is replacing humans?

“No, AI will automate repetitive tasks, but humans are needed for decision-making and creativity.”

32. What did you learn from Application Club?

“I learned how to frame good coding problems and analyse edge cases.”

What kind of questions did you test in contests?

“I tested DSA-based problems including arrays, strings, hashing, and logical problems, focusing on correctness and edge cases.”

33. What leadership experience did you gain as Student Sports Coordinator (Event Head)?

“I gained experience in coordination, task management, and handling real-time issues.”

34. How does being part of the cricket team help professionally?

“Cricket taught me teamwork, discipline, leadership, and handling pressure — all of which are important in professional environments.”

39. Which websites do you visit most for coding?

“LeetCode, GeeksforGeeks.”

40. What do you like to do most apart from studies?

“I like exploring technology and playing cricket.”

41. What are your salary expectations?

“I am comfortable with the company’s standard salary structure for freshers.”

42. Are you comfortable with company salary structure?

“Yes, I am comfortable with it.”

43. Do you have any questions for us?

- What growth/ learning opportunities are there for freshers?
 - How does Amdocs support learning?
 - What technologies will freshers mostly work on in the first year?
 - What makes a fresher successful here?
-

44. Would you like feedback on your interview?

“Yes, I would really appreciate feedback to improve myself.”

45. Is there anything else you would like to add?

“I am eager to learn, grow, and contribute long-term to the organization.”

46. CEO?

Shuky Sheffer (President & Chief Executive Officer (CEO))-- October 1, 2018

47. If you could change one thing about your personality, what would it be? Why?

“I sometimes spend/take extra time to perfect things. Now I’m learning to balance speed and quality so I can deliver faster without compromising quality.”

48. Is money important to you?

“Yes, money is important because it provides stability and independence. At the same time, learning, growth, and meaningful work matter more to me in the long run.”

//--

2. What were your favourite classes? Why?

“My favourite classes were programming and problem-solving related subjects because they involved logical thinking and practical application.”

4. Who were your favourite professors? Why?

“My favourite professors were those who explained concepts clearly and encouraged practical learning rather than just theory.”

5. Tell me about a time when you prioritized elements of a complicated project.

“While working on a project, I first identified critical features, fixed core functionality, and then moved to enhancements. This helped me meet deadlines without compromising quality.”

1. Summarize your college life in 2 minutes.

“My college life has been a mix of learning, challenges, and growth. Academically, I focused on strengthening my fundamentals and applying them through projects. I actively practiced problem solving and participated in coding contests. Outside academics, being part of clubs and sports helped me develop teamwork, discipline, and time management. Overall, college shaped me both technically and personally.”

--//

2. Tell us about an experience where you worked as part of a team.

“I worked in a team during a project where tasks were divided among members. I handled my responsibilities and also helped others when needed. Clear communication and coordination helped us complete the project successfully.”

3. How do you evaluate success?

“I evaluate success by continuous improvement, learning from mistakes, and achieving goals with consistency rather than just short-term results.”

5. Have you ever had a conflict with a boss or professor? How did you resolve it?

“Yes, there was a difference of opinion once. I resolved it by listening carefully, explaining my perspective calmly, and reaching a mutual understanding.”

31. What motivates you?

“My motivation comes from learning new things, solving problems, and improving myself step by step.”

32. How long can you commit to work for us?

“I’m looking for a long-term association where I can grow, learn, and contribute consistently. I’m committed for the long run.”

33. What has been your biggest failure & achievement?

Failure:

“Initially struggling in competitive coding contests due to lack of strategy, which taught me consistency and better preparation.”

Achievement:

“Building real-world projects and solving 900+ problems, showing steady improvement and discipline.”

3. Tell me about a time when you had to adapt to a difficult situation.

“When project deadlines overlapped with exams, I adapted by planning tasks, prioritizing work, and maintaining focus under pressure.”

4. How much training do you think you’ll need to become a productive employee?

“With initial onboarding and guidance, I believe I can become productive within a few weeks by learning systems and workflows.”

48. What qualities do you feel a successful manager should have?

"A successful manager should have clear communication, technical understanding, empathy, decision-making ability, and the skill to motivate the team."

49. Will it be feasible for you if the job requires a lot of travel?

"Yes, I am comfortable with travel if the job requires it."

50. Mention a few important decisions you have taken in your life.

"Choosing MCA after BSc, focusing seriously on skill development, and consistently practicing problem solving were important decisions."

51. How would you describe your ideal job?

"An ideal job for me is one that offers learning, challenges, teamwork, and long-term growth."

53. Why did you choose this career?

"I chose this career because I enjoy logical thinking, problem solving, and building solutions using technology."

54. When did you decide on this career?

"I decided on this career during my graduation when I developed a strong interest in programming and computers."

What do you think it takes to be successful in this career?

"Continuous learning, consistency, adaptability, and teamwork are key to being successful in this career."

HR Introduction (Spoken Version)

"Hello sir/ma'am, my name is Aditya Maurya. I am a final-year MCA student at MNNIT Allahabad. During my MCA, I focused on building strong technical fundamentals and applying them through projects.

I have worked on two major projects. The first is an **Automatic Attendance System**, where I used face recognition to mark attendance automatically.

My second project is **DailyFit**, a MERN-stack application that allows users to book gym access on a daily basis. In this project, I was responsible for backend development, including authentication, security features, database schema design, and payment integration.

Apart from academics, I was an active member of the **Application Club**, where I helped in testing contest questions, and I was also part of the **college cricket team**, which helped me develop teamwork and discipline.

Overall, I am a quick learner, interested in backend development and problem solving, and I am looking forward to starting my career in a professional environment where I can grow and contribute.”

MNNIT – Worst Thing

“Honestly, academics at MNNIT are quite demanding. Sometimes the syllabus and deadlines become stressful, especially during exams and project submissions. But that pressure also helped me learn time management and consistency.”

MNNIT – Best Things

“The best thing about MNNIT is the exposure. The competitive environment, coding culture, and peer learning really push you to improve. Faculty guidance and campus life also helped me grow both technically and personally.”

37. Can You Learn Java After Joining?

“Yes, definitely. I already know programming fundamentals and OOPS concepts. Learning Java in depth is something I’m confident about.”

38. Expectation from Manager

“Clear guidance, feedback, and learning opportunities.”

Tell me about your project(s)

Automatic Attendance System

- **Problem:** Manual attendance, proxy issues
- **Uniqueness:** Face recognition, automation
- **Tech:** Python, OpenCV
- **Role:** Complete implementation
- **Type:** Individual project

DailyFit

- **Problem:** Manual fitness tracking

- **Uniqueness:** Fitness + diet in one app
 - **Tech:** JavaScript, backend APIs, NoSQL DB
 - **Role:** Backend & database
 - **Type:** Group project
-

38. If funded, which startup would you open?

"A tech platform focused on education and skill development."

39. If company supports anything, what will you do?

"I will upskill and contribute to impactful projects."

40. If I ask you to choose one project and expand it, what will you do and how much money do you want?

"I would choose **DailyFit** and expand it into a scalable fitness-booking platform. I would add features like real-time slot availability, secure payments, gym owner analytics, and mobile app support.

Initially, I would need a **small seed budget** mainly for cloud infrastructure, payment gateway setup, and basic marketing. Around **₹10–15 lakhs** would be sufficient to build a stable MVP and test it in a few cities."

41. Team members for startup

"Skilled, motivated, and collaborative people."

"I would choose people who are hardworking, adaptable, honest, good communicators, and willing to learn. Team attitude matters more to me than just skills."

◆ **NIT ALLAHABAD / AI-ML CURRICULUM**

Soft Computing

- Neural Networks (Perceptron, MLP)
- Fuzzy Logic & Neuro-Fuzzy Systems
- Pattern recognition concepts

Data Mining

- Classification (Decision Tree, Naive Bayes, ANN, SVM)
- Clustering (K-Means, KNN)
- Association Rule Mining (Apriori)

- Regression, Model Evaluation (ROC, Bagging, Boosting)

Web Mining

- NLP basics
 - Content, structure & usage mining
 - Recommendation systems
-

42 Motivation for Projects

“Real-world problem solve karna + skill improvement”

43 Why LeetCode / GFG?

LeetCode → DSA practice

GFG → Concept clarity

Walk me through your resume.

“Currently, I am pursuing MCA from MNNIT Allahabad. I completed my BSc earlier, and during MCA I focused heavily on practical learning through projects and problem solving. I have built projects like an Automatic Attendance System using ML and IoT, and a full-stack MERN application called DailyFit. Alongside this, I regularly practice DSA and have solved more than 940 problems on coding platforms.”

44. You secured 4th position in OPC 2.0 — what does that say about you?

“It reflects my problem-solving ability, consistency in practice, and ability to perform under competitive conditions.”

◆ BEHAVIORAL / SITUATIONAL (NON-HR THEORY)

45. If a bug is found in your deployed project, how do you debug it?

“I first reproduce the issue, check logs, isolate the faulty module, fix the root cause, test thoroughly, and then redeploy.”

How do you prioritize tasks during exams and projects?

“I plan tasks in advance, set priorities based on deadlines, and break work into smaller achievable parts.”

46. How do you learn a new technology quickly?

"I start with basics, read official documentation, build a small project, and then gradually deepen my understanding."

Which project are you most proud of and why?

"I am most proud of the **Automatic Attendance System** because it combines machine learning, hardware constraints, and real-world usability. Deploying it on Raspberry Pi and achieving high accuracy taught me how theory works in practical environments."

If given 6 months, which project would you convert into a product?

"I would convert **DailyFit** into a product because it solves a real-world problem and has clear scope for scaling, monetization, and feature expansion."

How would you expand DailyFit in 6 months?

"I would add real-time availability updates, better search and filters, analytics for gym owners, secure payment handling, and scalable deployment."

How do your skills fit Amdocs' work culture?

"My skills align with Amdocs' focus on large-scale systems, structured development, and continuous learning. I am comfortable working on backend logic, problem solving, and collaborating in team-based environments."

How comfortable are you learning enterprise-level systems?

"I am comfortable learning enterprise systems. My projects required understanding complete flows, handling edge cases, and working with constraints, which prepares me well for enterprise-level applications."

How do you handle complex systems that you don't fully understand initially?

"I break the system into smaller modules, understand each part step by step, refer to documentation, and ask questions when needed."

How do you see yourself growing at Amdocs?

"I see myself growing as a reliable software engineer who understands both technical and business aspects of systems, and gradually taking ownership of larger modules."

3 What makes Amdocs different from other IT companies?

“Amdocs focuses on **long-term enterprise solutions**, not short-term projects. The scale, complexity, and impact of its systems make it different.”

How do your skills align with Amdocs?

“My experience in backend logic, data handling, problem solving, and system thinking aligns well with Amdocs’ enterprise software development.”

7 What do you expect from Amdocs?

“I expect learning opportunities, mentorship, and exposure to real-world systems that help me grow as a software engineer.”

8 What do you know about Amdocs’ work domain?

“Amdocs primarily works in telecom and digital services, helping operators manage billing, customer experience, and network-related operations.”

9 Are you comfortable working on legacy systems?

“Yes. I understand enterprise systems often include legacy components, and I’m comfortable learning and maintaining them.”

1 1 What motivates you to join Amdocs over startups?

“Amdocs offers system stability, deep technical exposure, and structured learning, which is ideal for the early phase of my career.”

1 3 What if you’re assigned a technology you don’t know?

“I will learn it quickly by studying documentation, practicing, and seeking guidance.”

1 4 Are you comfortable with shifts and global teams?

“Yes, I’m comfortable working in shifts and collaborating with global teams.”

1 5 Where do you see yourself at Amdocs in 3–5 years?

“I see myself as a skilled engineer contributing to critical modules and taking ownership of larger responsibilities.”
